Art Unit: 3727

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 - 12 and 24 - 26 drawn to a latch system, classified in class 292, subclass
?.
 - II. Claims 13 - 23, 27, and 28, drawn to container, classified in class 220, subclass
4.21.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the container of group II does not require the particulars of the latch system of group I. The subcombination has separate utility such as a latch system for a door.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
